CHAS. E. ATWATER.

MRS. S. SCROGGY.

Akron, Ohio, August 10, 1908.

This is true only of good blood, or when in a normal, healthy state. There are times when the blood is so tainted with disease and polluted and poisoned that it loses its proper consistency, its richness and purity, and becomes pale and anaemic, weak and almost as thin as water. Being the storehouse of the body and the fountain-source from which the rest of the system is nourished and sustained, the purity of the blood must be maintained or every organ, nerve and tissue in the body is weakened, and sickness and disease develop.

Rich, pure blood, full of life-giving elements and teeming with millions of red corpuscles is the kind that makes strong muscles, healthy nerves and vigorous bodies. To keep this

kien, putre blood, full of file-giving elements and teeming with millions of red corpuscies is the kind that makes strong muscles, healthy nerves and vigorous bodies. To keep this great life stream free of impurities is essential to the enjoyment of full and perfect health. A large majority of human ailments are due to a bad condition of the blood. Sores and Ulcers, Abscesses, Boils and Skin Bruptions of various kinds are some of the full and perfect health. I am confident that I suffered as badly from a plain oase of Hives as any poor human ever did. I have been the operation. The worst feature of compelled to get up at night and walk in my yard to get the operation. The worst feature of the operation. The worst feature of compelled to get up at night and walk in my yard to get mankind a permanent good. I am a numerous signs of a contaminated, tainnumerous signs of a contaminated, tainted blood. Weak and watery blood makes weak and frail bodies. Anaemic, waxy, sallow complexions, flabby muscles, shattered nerves, black heads, pimples and various other skin diseases denote blood poverty and a weak condition of this rital fluid, and that its nutritious qualities

have been destroyed. To keep this great life-stream in health requires that all morbid matter and poisnous secretions be promptly removed, r it becomes a source of disease itself,

oisoning instead of nourishing the sysem, and producing an endless train of lumps were hard and I had heretofore been unable to get anything that would have any effect on them. After takdiseases. The blood must be kept rich, ing only a few bottles of the medicine I noticed a decided strong and pure or it cannot perform its improvement, and after taking eight bottles the lumps entirely disappeared. proper offices. The nutritious elements when lacking must be renewed, all ob-

structions to a full and free circulation removed, and humors, and poisons, of every kind antidoted and driven out. To do this requires a blood purifier that enters into the circula

By the Wonderful New Alveolar Method.

Thought Incurable.

Before the faculty of one of the foremost dental universities of this country and prominent members of the City Dental Society, the most conspicuous representatives of the profession that could assemble, a demonstration of a most remarkable new invention that has already revolutionized a certain procedure in dentistry was given with complete success. Prominent dentists admit that they will have to abandon many of their pet methods for the invention-discovery of Dr. G. Gordon Martin, who is not only a dentist, but a graduate physician as well. No dentist and no doctor could have solved this epoch-making problem, but it took a combination of both, and Dr. Martin's invention. At the reason so much importance is attached to Dr. Martin's invention. At the clinic Dr. Martin proved to the professional men present that he could cure Pyorrhea, no matter in what awful festering condition the gums, followed by loos-ening and falling out of the teeth, is the reason so much importance is attached to Dr. Martin's invention. At the clinic Dr. Martin proved to the professional men present that he could cure Pyorrhea, no matter in what awful festering condition the gums, followed by loos-ening and falling out of the teeth, is the reason so much importance is attached to Dr. Martin 's invention. At the clinic Dr. Martin proved to the professional men present that he could cure Pyorrhea, no matter in what awful festering condition the gums, followed by invention. At tached to Dr. Martin proved to the professional men present that he could cure Pyorrhea, no matter in what awful festering condition the gums, followed by invention. At tached to Dr. Martin proved to the professional men present that he clinic Dr. Martin proved to the could cure Pyorrhea, no matter in what awful festering condition the gums, followed by invention. At tached to Dr. Martin proved to the clinic Dr. Martin proved to the clinic Dr. Martin proved to the could cure Pyorrhea, no matter in what awful festering condition the gums, followed by invention. At

Dr. Martin's idea has received the sanction of the United States Government, which has granted special privileges because it recognizes the idea as a decided and original step for the advance of the dental profession; and it has also received exclusive in-dorsement from the official authorities of Germany, England, France, Spain and Canada, and every civilized country in the world has been consideration. As privileges were granted by the six leading countries friends that the others will follow fact that Europe especially is very alert to the advancement of denwhatever progress it has made to and the kind who call attention merican ingenuity, for Americans re the leading dentists of Europe.

While Dr. Martin very justly gives his invention to the world, so that human benefit may accrue from it. yet if he were so disposed he could ernments, no one but he, unless authorized by him, has a right to its use. On the face of it this assertion may seem far-fetched, but it is really very true, as several dentists who tin's rights are unquestioned.

Leading Dentists Approve It.

Dr. Martin's invention is a radical simple that the wonder is that some one had not thought of it before. The first statement that can be made for enough—is that it does away entirely have tried it know, it is a very, very painful procedure; so much so that compelled to get up at night and walk in my yard to get relief, or in a way to get my mind off the terrible itching and burning. Frequently I have had it begin in the foot and extend clear to the head in the form of bumps as large as an ordinary size marble. They were red in color and the pain and smarting from them would almost run me gray. The attacks I suffered periodically. I spent hundreds of dollars with the physicians and different medicines in an effort to get cured, but nothing took hold and gave the prompt and permanent relief S. S. S. did. Haven't been troubled with hives in any way for some months the fastenings give way, the gums become suppurated or inflamed, the teeth come out and the mouth is in worse shape than before. The invention of Dr. Martin will also do away with the wearing of false teeth on a plate. Not every mouth is so constructed that it can hold a plate, and when it is considered that plates become foul from the lodgment of food, that they make preparation made that can compare with S. S. S. as a cure the breath bad, that they interfere with clear enunciation, that they are paration made that can compare with S. S. S. as a cure very easily detected, that they are liable to fall out under excitement or during sleep, that they inflame and weaken the gums, that they are a menace and disfigurement at all Ten years ago I used S. S. S. with very satisfactory results. My blood was in fearfully bad shape, either the result of inherited or acquired blood taint. Large lumps times, it is small wonder that the appeared on my neck, head and forehead. I consulted a leading dentists of the country have specialist who advised S. S., and I began its use. These halled the new invention as the redeemer of a profession that has been at a standstill for progress.

Clinical Demonstration Successful. It is no less valuable in the case of falling teeth. Many persons are disease—some denafflicted with a disease tists say it is constitutional, but Dr. experience to tell the one from the other. They could not do it.

This new discovery has been most

Does Away with Bridge Work sensationally successful in that most stubborn of all dental diseases known and Plate Method of Faise as Pyorrhea, or a discharge of pus from the gums. That dentists have Teeth, Saves Falling Teeth, heretofore despaired of ever being able to cure a condition of this kind, as it is a theory of the profession Gum Diseases Heretofore as it is a theory of the profession that it is impossible to do so, as this disease causes inflammation and receding of the gums, followed by loos Before the faculty of one of the ening and falling out of the teeth, is

The Public Will Benefit.

Like the majority of men who give up their lives to laboratory work, Dr. Martin has been so engrossed in furthering his new method of dentistry that he has had no time for making money; but he has succeeded in interesting a prominent and wealthy physician, who at a great expense has fitted up sumptuous offices for Dr. Martin and his corps of specialists at 320 Fifth avenue, corner 32d street. These offices are no doubt the most elaborate for dental use ever fitted of the world, there is no question in out in this country. There are laboratories and private offices as well as the newest appliances for the use of the expert dentists, each a specialist in his own line. It may be said right here that this venture in behalf of tistry, which is etill more or less in its infancy over there, and owes with dental "institutes," "parlors," their announcements by a set of grin ning teeth. The highest class of den tal work of every kind will be per formed. It is impossible to get the benefit of his inventions except by consulting him. The doctor will be keep it entirely to himself, as, by the sanctions granted by the various gov. They will not obligate themselves by

To representatives of the daily have become alarmed have had the engaged in his laboratory, he gave a question looked up by their attormost courteous welcome, and when ion looked up by their attor-and they report that Dr. Mar-asked to tell something of the invenby the principal governments of the world, he said:

Interview with Dr. Martin.

"I am of French descent. I have studied abroad. I was at work or this off and on for fifteen years. might say that I have used it in my practice for ten years and with genu-ine success. A board of physicians, ally known, is the method universally used to-day as a substitute for rubber plates. This is done by fastening the artificial teeth to a good tooth on either side. As all who have tried it know, it is a very mainful received written authorizations, after substitute of physicians, dentists, surgeons and patent experts sat in judgment on my invention at Washington, and after the most careful scrutiny sanctioned its use. 99th YEAR WPERTHWA & SONS

HARLEM: 121st Street @ 3d Ave. 2226 to 2234 Third Ave.

DOWNTOWN: Chatham Square. 193 to 205 Park Row.

Moral Courage In House Cleaning

T takes moral courage to put a matting or a carpet down when its frayed and threadworn condition says plainly it is worn out.

To look daily at a broken table or chair—to sleep nightly in a decrepit bed—at dinner time to note the absence of necessary glass or china—are forms of domestic fortitude neither necessary nor justified in view of the opportunities offered by Cowperthwait & Sons.

Things have worn out or broken, perhaps, because they were not what the mer-represented them to be.

If so, it requires even more moral courage to visit that merchant for new things to take their places.

Confidence is a most essential feature in purchasing housekeeping articles. Cowperthwait & Sons have enjoyed the thorough confidence of thousands of the best housewives of New York for almost a century and the largest business in the city is 4

Only the best goods—only the lowest prices, marked in plain figures on the tags -liberal credit—fair statements and fair dealing.

As you rearrange your house for Summer there is no necessity to be a martyr to old things nor to doubtful new ones.

In the midst of the inexhaustible assortment of the Cowperthwait & Sons' Stores you can best judge of your exact needs and of the greatest genuine value obtainable for the amount you feel justified in spending, be it cash or liberal credit.

Gilt Clock and Two Bouquet | Stunning Reed Go-Cart. Holders, \$3.25

AN artistically finished clock, twenty inches high, that keeps good time, would seem an exceptional offering at the price, but when the two bouquet holders are included at the same figure t gives some idea of the extra value.

China Berry Dishes, 45c

CARLSBAD china, prettily decorated in floral designs and stippled with gold. Seven pieces, consisting of bowl and six plates. The small price conveys no idea of the real worth.

Folding Go-Cart, \$3.25 oak; good gear. price. 88.25. special one —lower than the
